Maximum Marks	4 Marks

Empathy Map Canvas:

This empathy map is designed to synthesize observed user traits and psychological patterns to gain a clearer understanding of fundamental consumer requirements. It encourages a design-thinking methodology that balances user objectives with the technical constraints inherent in the ShopEz MERN environment.

<u>Think & Feel</u> • Is my transactional data handled securely? • Will the physical product match the digital listing? • I expect a prompt and reliable delivery service. • Highly appreciates a balance of cost and quality.	<u>See</u> • Vivid, high-resolution product photography. • Comparative pricing data across marketplaces. • Fluid and adaptable web-based interface. • Real-time alerts regarding shipment progress.
<u>Hear</u> • User testimonials regarding item durability. • Digital influencers suggesting fashion trends. • System notifications about platform safety. • Social circles recommending intuitive apps.	<u>Say & Do</u> • Creates an account to explore product ranges. • Uses granular filters for size and color nuances. • "A streamlined payment path is essential." • Navigates via Men, Women, and Children segments.

Pain Points

- Overly complex signup and login procedures.
- Subpar performance and lag on mobile devices.
- Ambiguous or delayed order status information.
- Frustration with non-intuitive filter options.

Gains

- High-velocity performance via MERN integration.
- Instant retrieval of specific search queries.
- Unified portal for monitoring historical orders.
- Efficient administrative portal for stock control.
