Customer Problem Statement Template:

Developing a concise problem statement is vital for viewing the challenges through the eyes of the consumer. This template facilitates a focused approach toward identifying user pain points to ensure the final application delivers a truly impactful user experience.

A clearly defined customer problem statement empowers the development team to engineer optimized solutions. By identifying specific friction points, developers can better empathize with the end-user, leading to a deeper understanding of how the MERN-based ShopEz platform should address digital marketplace needs.

I am	An active digital shopper or a store supervisor.
I'm trying to	Locate specific products quickly or oversee the digital catalog.
but	Current web applications suffer from slow response times and complex layouts.
because	The existing systems lack a cohesive and modern MERN architecture.
which makes me feel	Discouraged and less likely to engage with the platform.

Example Entry:

[I am: A Parent] [Trying to: Buy kids clothes] [But: The site crashes] [Because: It is not scalable]
[Feel: Annoyed]

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Mobile-centric user	Navigate and purchase new seasonal inventory	Search filters do not function correctly on mobile view	The user interface is not optimized for handheld screen dimensions	Annoyed and prone to leaving the site
PS-2	Store Administrator	Manage and refresh stock quantities daily	Individual item updates are tedious and slow	The backend dashboard lacks efficient mass-update functionalities	Stressed and highly unproductive
